Executive Summary for BCTC Senior Project

This project will be a website available online through GitHub Pages. The project will be a visual technical demonstration that uses practical programming, codebase, and browser-specific usages, specifically a one-dimensional array, velocity jumping, and browser cookies. The presentation of the project will be in the form of a simulation for users to interact. It will minimally have three modes to try: Caring, wandering, and battle. The project will officially end its development on the **18th of March 2022**.
